

Patch 32895426 - GI Release Update 19.12.0.0.210720

1. Download/Copy Patch on server

On drive patches are under

<https://drive.google.com/drive/folders/1d2M3XvoZSxHtNT6VczwWaM0TzyHebuCG?usp=sharing>

copy patches on both server under /stage_software/RU12

```
mkdir -p /stage_software/RU12
cd /stage_software/RU12
p32895426_190000_Linux-x86-64.zip <--- GI patch
p6880880_122010_Linux-x86-64.zip <---- OPatch tool
```

-ensure the grid and oracle user can access it while applying

```
rac1:
chmod -R 775 /stage_software/RU12/
```

```
rac2:
chmod -R 775 /stage_software/RU12/
```

2. Verify cluster is healthy on both nodes

```
rac1:
su - grid
[grid@rac1 ~]$ crsctl check crs
CRS-4638: Oracle High Availability Services is online
CRS-4537: Cluster Ready Services is online
CRS-4529: Cluster Synchronization Services is online
CRS-4533: Event Manager is online
[grid@rac1 ~]$
```

```
rac2:
su - grid
[grid@rac2 ~]$ crsctl check crs
```

```
CRS-4638: Oracle High Availability Services is online
CRS-4537: Cluster Ready Services is online
CRS-4529: Cluster Synchronization Services is online
CRS-4533: Event Manager is online
[grid@rac1 ~]$
```

```
su - oracle
[oracle@rac1 ~]$ srvctl status database -d PROD -v -f
Instance PROD1 is running on node rac1 with online services PROD_APP. Instance status:
Open.
Instance PROD2 is running on node rac2 with online services PROD_APP. Instance status:
Open.
```

3. Update the Required/Latest OPatch tool version: On Both Nodes

Do the OPatch tool update on both nodes:

You must use the OPatch utility version 12.2.0.1.24 or later to apply this patch.

For grid home need to do as a root user as GI home is owned by root
after installatin

--Check current version

```
[oracle@rac1 RU12]$ /u002/app/oracle/product/19.3.0/grid/OPatch/opatch version
OPatch Version: 12.2.0.1.17
```

--/Update OPatch for GI home

```
su - root
cd /u002/app/oracle/product/19.3.0/grid
mv OPatch OPatch.old
unzip -qqo /stage_software/RU12/p6880880_122010_Linux-x86-64.zip -d .
chown -R grid:oinstall OPatch
chmod -R 775 OPatch
/u002/app/oracle/product/19.3.0/grid/OPatch/opatch version
```

For RDBMS we can do it as a oracle user

```
su - oracle
```

```
cd /u008/app/oracle/product/19.3.0/dbhome_1
```

```
mv OPatch OPatch.old
unzip -qqo /stage_software/RU12/p6880880_122010_Linux-x86-64.zip -d .
chown -R oracle:oinstall OPatch
chmod -R 775 OPatch
/u008/app/oracle/product/19.3.0/dbhome_1/OPatch/patch version
```

4. Apply Patch using OPatch auto

rac1:

a. Run first in Anlyze mode and see the result , anayze just checks the prerequisites part does not apply patch

```
su - root
/u002/app/oracle/product/19.3.0/grid/OPatch/patchauto apply /stage_software/RU12/33509923
-analyze
```

b. Actual apply

--Stop the instance with transaction mode , this will allow all the application users connected to this instance to finish the transaction and new sessions will be diverted to instance 2

```
[oracle@rac1 ~]$ srvctl status database -d PROD -v -f
Instance PROD1 is running on node rac1. Instance status: Open.
Instance PROD2 is running on node rac2. Instance status: Open.
```

```
[oracle@rac1 ~]$ srvctl stop instance -i PROD1 -d PROD -o transactional
```

```
[oracle@rac1 ~]$ srvctl status database -d PROD -v -f
Instance PROD1 is not running on node rac1
Instance PROD2 is running on node rac2. Instance status: Open.
[oracle@rac1 ~]$
```

```
su - root
/u002/app/oracle/product/19.3.0/grid/OPatch/patchauto apply
/stage_software/RU12/33509923
```

5. Verify the Patches

Once opatchauto is successfull verify the patches

```
[root@rac1 grid]# su - grid
[grid@rac1 ~]$ /u002/app/oracle/product/19.3.0/grid/OPatch/patch lspatches -oh
/u002/app/oracle/product/19.3.0/grid
32585572;DBWLM RELEASE UPDATE 19.0.0.0.0 (32585572)
32584670;TOMCAT RELEASE UPDATE 19.0.0.0.0 (32584670)
32579761;OCW RELEASE UPDATE 19.11.0.0.0 (32579761)
32576499;ACFS RELEASE UPDATE 19.11.0.0.0 (32576499)
32545013;Database Release Update : 19.11.0.0.210420 (32545013)
```

OPatch succeeded.

```
[root@rac1 grid]# su - oracle
Last login: Mon Jul  5 17:06:37 IST 2021
[oracle@rac1 ~]$ /u008/app/oracle/product/19.3.0/dbhome_1/OPatch/patch lspatches -oh
/u008/app/oracle/product/19.3.0/dbhome_1
32579761;OCW RELEASE UPDATE 19.11.0.0.0 (32579761)
32545013;Database Release Update : 19.11.0.0.210420 (32545013)
```

OPatch succeeded.

rac2:

a. Run first in Anlyze mode and see the result , anayze just checks the prerequisites part does not apply patch

```
su - root
/u002/app/oracle/product/19.3.0/grid/OPatch/patchauto apply /stage_software/RU12/33509923
-analyze
```

b. Actual apply

```
su - root
/u002/app/oracle/product/19.3.0/grid/OPatch/patchauto apply /stage_software/RU12/33509923
```

c. Verify the Patches

Once opatchauto is successfull verify the patches

--what if opatchauto fails

1. identify and fix the failure
2. resume opatchauto

/u002/app/oracle/product/19.3.0/grid/OPatch/patchauto resume

should show as below 19.3 only

```
[root@rac1 grid]# su - grid
```

```
Last login: Mon Jul  5 17:42:02 IST 2021
```

```
[grid@rac1 ~]$ /u002/app/oracle/product/19.3.0/grid/OPatch/patchauto resume
```

```
/u002/app/oracle/product/19.3.0/grid
```

```
29585399;OCW RELEASE UPDATE 19.3.0.0.0 (29585399)
```

```
29517247;ACFS RELEASE UPDATE 19.3.0.0.0 (29517247)
```

```
29517242;Database Release Update : 19.3.0.0.190416 (29517242)
```

```
29401763;TOMCAT RELEASE UPDATE 19.0.0.0.0 (29401763)
```

OPatch succeeded.

```
[grid@rac1 ~]$ logout
```

```
[root@rac1 grid]#
```

```
[root@rac1 grid]# su - oracle
```

```
Last login: Mon Jul  5 17:43:26 IST 2021
```

```
[oracle@rac1 ~]$ /u008/app/oracle/product/19.3.0/dbhome_1/OPatch/patchauto resume
```

```
/u008/app/oracle/product/19.3.0/dbhome_1
```

```
29585399;OCW RELEASE UPDATE 19.3.0.0.0 (29585399)
```

```
29517242;Database Release Update : 19.3.0.0.190416 (29517242)
```

--what if patchauto resume fails

1. Check what are the patches applied

/u002/app/oracle/product/19.3.0/grid/OPatch/patchauto resume

2. Apply remaining Patches manually if any

Example below if any patch is missing

```
/u002/app/oracle/product/19.3.0/grid/OPatch/opatch apply -oh
/u002/app/oracle/product/19.3.0/grid -local /stage_software/RU12/32895426/32916816 -silent
/u002/app/oracle/product/19.3.0/grid/OPatch/opatch apply -oh
/u002/app/oracle/product/19.3.0/grid -local /stage_software/RU12/32895426/32915586 -silent
/u002/app/oracle/product/19.3.0/grid/OPatch/opatch apply -oh
/u002/app/oracle/product/19.3.0/grid -local /stage_software/RU12/32895426/32585572 -silent
/u002/app/oracle/product/19.3.0/grid/OPatch/opatch apply -oh
/u002/app/oracle/product/19.3.0/grid -local /stage_software/RU12/32895426/32904851 -silent
/u002/app/oracle/product/19.3.0/grid/OPatch/opatch apply -oh
/u002/app/oracle/product/19.3.0/grid -local /stage_software/RU12/32895426/32918050 -silent
```

3. Run the Post Patch

```
/u002/app/oracle/product/19.3.0/grid/rdbms/install/rootadd_rdbms.sh
/u002/app/oracle/product/19.3.0/grid/crs/install/rootcrs.sh -postpatch
```

Rollback:

Follow one node at a time approach

rac1:

```
/u002/app/oracle/product/19.3.0/grid/OPatch/patchauto rollback
/stage_software/RU12/32895426/32916816 -analyze
/u002/app/oracle/product/19.3.0/grid/OPatch/patchauto rollback
/stage_software/RU12/32895426/32916816
```

rac2:

```
/u002/app/oracle/product/19.3.0/grid/OPatch/patchauto rollback
/stage_software/RU12/32895426/32916816 -analyze
/u002/app/oracle/product/19.3.0/grid/OPatch/patchauto rollback
/stage_software/RU12/32895426/32916816
```
